

SPECIFICATION FOR 16 DRUM COMBI STORAGE

	1840/CBS1
Size	600 x 300 x 335.7 cm
Stores	16 x 205 litre drums + shelved walk in area
Sump Capacity	4500 litres
Tare weight	3000 kg
Colour	Green RAL 6029

Description:

The base is manufactured from 3mm mild steel sheet with RHS cross members and pressed ribs.

All corner posts, shelves, main rails and cross members are from rolled hollow section.

The back, sides and door panels are pressed from 2mm mild steel sheet corrugated where required.

The roof is pressed and fitted with suitable bracing and fully welded around perimeter.

One end of the unit is fitted with lockable, sliding doors giving access to a shelved area for up to 4 pallets of 205ltr drums.

The walk-in compartment is accessed via a hinged door on the side of the unit and has shelving for small containers.

The internal divide between the walk-in area and the back of the shelved pallet store location is an open framework divide.

As a chargeable option we can “wall” this area to completely separate the two compartments, this can be either a simple single skin or a fire rated double insulated divider.

The entire unit is protected by a fully seam welded sump covered by a galvanised grid mesh in the walk-in area and galvanised support channels in the drum storage area.

Full width base plinths eliminate ground contact, the sloping roof has crane-lifting points and the unit is shot blasted before being painted.

The sump fully complies with all the UK regulations relating to sump capacities.

Note:

All weights, dimensions, and other figures quoted are approximate.
