Description:

The base is manufactured from 3mm mild steel sheet with RHS cross members, all the corner posts, main rails and cross members are from rolled hollow section and the back side and door panels are pressed from 2mm mild steel sheet, corrugated if required.

The roof is pressed and fitted with suitable bracing and fully welded around the perimeter. High and low level louvre vents complete with flame arrestor mesh are fitted as standard and the double steel sliding doors run on easy glide tracks.

The unit uses grid mesh above the fully seam welded sump, has a full width/full depth shelves and two full width 700mm deep shelves above that.

The unit is shot blasted before being painted.

The sump fully complies with all the UK regulations relating to sump capacities.
